

Lab 2: Basic Express Website with JavaScript. (5 points). Due Feb 10, by 5pm.

1. Use this link to get the github repo: <https://classroom.github.com/a/m1-HdW8D>
2. Update the README with your name and lab 2
3. Create the .gitignore file.
4. Get your node.js space setup. Following directions lectures n1 and n2
5. Create a web server using express that has at least 2 routes and 404, plus 500 page.
6. There should be at least 2 pages containing dynamic data displayed.
 - a. This could mean you are using handbars like lecture n4 or not. It's up to you.
 - b. You can include a basic form if you want to from n3, but it will be covered in lab3.

Turn in:

1. Make sure the readme has been updated, name, lab2.
2. Update the AI use section
3. Add a description of website, how it works, and screen shots showing it works.
 - a. Include links for the routes, so it's easy to figure out.
4. Finally make sure you push everything to get github.
