

Lab 3: Forms. (5 points). Due Feb 17, by 5pm.

1. Use this link to get the github repo: <https://classroom.github.com/a/TqWHlWmN>
2. Update the README with your name and lab 3
3. Create the .gitignore file.
4. Get your node.js space setup. Following directions lectures n1 and n2
5. You can continue your lab2 or start anew.
6. Create a web server using express that has a 404, plus 500 page.
7. Include 2 different forms. The data doesn't need to be stored, but it should be displayed on the "process" page.
8. You should have at least one cookie or session data. They should be settable and display on at least one page.
  - a. They could set by a form, but not required. An example you could set a cookie/session variable with the user's name that comes from a form.

Turn in:

1. Make sure the readme has been updated, name, lab3.
2. Update the AI use section
3. Add a description of website, how it works, and screen shots show it works.
  - a. Include links for the routes, so it's easy to figure out.
4. Finally make sure you push everything to get github.
