Lab 8: working with routes or multiple screens.

1. Use this link to get the github repo: https://classroom.github.com/a/eJl_sPFD
2. Update the README with your name and lab 8
3. Using Android studio or Visual Studio Code, create a project.
4. Building on lab7. You are going to have several lists.
5. Using a drawer or navigationBar or navigationRail, that includes 3 categories (names/icons are your choice)
   a. The first category is the default show when the app starts.
   b. In each category, the user will add items to the list for that category and edit the item. Delete is again optional.

Turn in:

1. Make sure the readme has been updated.
2. Update the AI use section
3. Add a description of how to run the app. You can include a video of the app working for the grader to review.
4. Finally make sure you push everything to get github.
